

## **Michael W. Marlar**

Mr. Marlar has over 35 years in the Construction Testing/Construction Quality Control Industry. His experience includes admixture technical services, development of concrete mix designs, development of admixtures, and quality control on major infrastructure projects. He also was vice president and ownership partner of small independent CMT Company in North Texas for 20 years.

He has been serving as supplemental examiner for ACI Field Technicians for 15+ years. He has also served multiple terms on the Northeast Texas Chapter ACI, as well as serving 5 years as the Director of Education.

He currently serves as Construction Quality Control Manager for Colorado River Constructors, a joint venture between Fluor Construction, and Balfour Beatty Infrastructure. They are reconstructing 8 miles of US 183 between US 290 and SH 71 in Austin, Texas.
